DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: The embodiment of a combined tissue dispensing and receiving apparatus having a dispensing aperture sited on the side wall of the dispensing apparatus adjacent the receiving compartment as exemplified in Fig. 2.

Species II: The embodiment of a combined tissue dispensing and receiving apparatus having a dispensing aperture sited on the bottom opposite the receiving compartment as exemplified in Fig. 3.

2. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 36-38 and 40-47 appear to be generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and listing of all claims readable thereon, including any claims subsequently added. An argument that

a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitation of an allowed generic claim as provided by 37 C. F. R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M. P. E. P. sec 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U. S. C. § 103 of the other invention.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Exmr. Michael E. Butler whose telephone number is (703) 308-8344.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald Walsh, can be reached on (703) 306-4173. The fax number for the Group is (703) 305-7687.
